

Managed by Honeywell

HIRING OUR HEROES

Careers for Veterans

Hundreds of veterans have applied their skills and military experience to launch civilian careers at the Kansas City National Security Campus. Honeywell helps vets make a seamless transition into a new national security mission: ensuring the safety and security of the nation's nuclear deterrent.

The KCNSC is one of eight sites under the Department of Energy's National Nuclear Security Administration that develops advanced solutions for complex national security issues, from prototype simulations to production to quality testing. Since 1949, Honeywell has served as the managing contractor of the KCNSC and has earned a valued reputation for delivering trusted innovation to national security.

In the past few years, we've experienced unprecedented growth due to our nation's Nuclear Posture Review and modernization efforts. We're actively recruiting more veterans to join our exciting mission.

What does this growth mean to you?

- New opportunities
- Intriguing challenges
- Rewarding work that matters

This is an exciting time to be part of the national security mission.

862 Veterans
